

Your Global Reagents Partner

Collaboration Overview

Introduction

- **Ximbio**
 - World's largest non-profit organisation dedicated to commercial use of life science laboratory research tools, reagents, and materials
 - Wholly owned subsidiary of Cancer Research UK
 - Partnerships with more than **150 Technology Transfer Offices**, over **2000 researchers** and more than **200 life science companies** worldwide
- **Partnership with Charles University**
 - Sale of compounds and other research tools developed at CUNI through Ximbio's portfolio (Ximbio.com)
 - Ximbio pays CUNI **60 %** of revenue generated by offered compounds
 - Researchers are entitled to up to 55 % of the received sum based on **Rector's Directive No. 46/2018**
 - Requires **minimum effort** on researcher's side
 - Preparation of compounds in required commercial amounts takes place in Ximbio's labs based on provided preparation protocols
 - Opportunity to **repurpose compounds and tools** developed in research projects and with no further use
 - Interest in compounds and tools both with and without IP protection

Ximbio's Portfolio

Monoclonal Antibodies

Polyclonal Antibodies

Cell Lines

Mouse Models

Small Molecules

Vectors

Peptides and Proteins

Zebrafish

Recombinant Antibodies

Lab Consumables

Bacteria

What Is Required to Provide?

- Structure or any other form of **characterisation** of offered research tools
- **Preparation protocols**
- **Optional:**
 - Small samples for analyses
 - Can be crude (Ximbio will purify them themselves)
 - Data from analyses, biological testing, etc.
 - Information on original intended use and other potential applications
 - Information on expected biological activity
 - Other available relevant documentation
